REMARKS

The specification has been amended to claim benefit of priority of the copending applications and to include the current address of the American Type Culture Collection (ATCC).

The amendment to the drawings is directed to a matter of form.

The amendments requesting that a "μ" be inserted in front of "g" or "l" in the specification find clear support in the provisional application, 60/013,613, to which the present application claims priority. In the process of converting the parent application, to which the present application claims priority, from a provisional application to a non-provisional application, a different word processing program was used. This word processing program failed to recognize the special character "μ" or "°" leaving a blank space in the non-provisional document.

The following chart corresponds the location of the blank space in the non-provisional document with the position in the provisional application that evidences the existence of a "μ" or "°" in applicants' priority document.

Thus, because the errors are typographical in nature and plain on their face to one of ordinary skill in the art, no new matter will be added by way of the amendments which add a "µ" in front of "g" or "l" or a "°" in front of "C."

No new matter has been added by way of amendment.

Entry of the above amendments and remarks is respectfully requested.

If there are any fees due in connection with the filing of this paper, please charge the fees to our Deposit Account No. 08-3425.

Respectfully submitted,
